

CRIO THERAPY TECHNICAL SHEET

Electro-aesthetic equipment designed to perform beauty treatments, both facial and body, by the application of cold in a localized way.

- Manufacturer: ARB Systems Proyectos Electrónicos SL - CIF. B 84931070
- Trademark: ARB - **Model: Crio Therapy**
- Supply voltage: 115 / 230 V - Frequency: 50 / 60 HZ,
(The equipment is factory set for the voltage and frequency of use)
- **Maximum power: 520 W.** - Maximum consumption: 3A.
- **Resettable fuses**
- Control and programming module
- Cooling module
- Digital temperature control, (Digital temperature and safety sensors)
- Pressure sensors in each of the hydraulic circuits
- **Digital Level Sensors**
- User Interface: Touch Screen
- Treatment Counter
- Temperature exchangers suitable for each of the zones to be treated
- Polystyrene Chassis (PS), (meets flammability standard: UL 94)
- The Fluid in circulation complies with standards: UNE 26361 88, INTA 157 413, BRITISH STANDART 6580, among others ...
- Alarm module:
 - Overheating - **Overpressure** -
 - Low level of fluid - Communications failure
- **Equipment Dimensions: 58 X 52 X 110 High**
- **Equipment weight: 40 Kg**
- **The equipment is shipped palletized and the dimensions and weight are:**
 - **60 X 80 X 131 cm high** - **Weight: 60 Kg aprox.**
- The equipment for installation only needs a power outlet
